The subject documents, prepared by CH2M-Hill and dated May 31, 1988 and May 1988, respectively, have been reviewed as requested. As was relayed to you in discussion with William Bunn, LABO, on June 3, 1988, these documents appear to be suitable for their intended purpose. I suggest that an updated signature page for the QAPjP be completed. Please provide me a copy of the completed signature page for my files.
